Summer Fun Day programs at the Walter P. Chrysler Museum are designed for students in grades K-8 and run approximately 3-4 hours in length. The visit begins with an interactive guided tour from Walter's Workshop to the first Chrysler cars, to Jeep® vehicles to race cars, exhibits and hands-on experiences connect the development of the automobile and world transportation to Michigan's history. Following the tour, groups will participate in two pre-selected activities from the **Summer Fun Day** list below:

1. **Those Puzzling Cars** (Grades K-2) Children will engage in puzzle activities that explore automobiles and transportation from Chrysler's past to the present day.
2. **Amazing Machines** (Grades 1-4) Children will explore the types of simple machines, then select and draw items to match simple machine categories.
3. **Draw It!** (Grades 1-4) Participants will receive a *Draw A Car Book* to assist them in drawing a favorite car at the museum or in creating a unique vehicle of their own.
4. **Find That Shape!** (Grades K-3) Children will play a game using shapes that can be identified on the 1948 Town and Country (Woody) car.
5. **Build A Race Car!** (Grades K-8) Kids have fun using Legos® to build a race car. They will test their car and then make modifications to improve and enhance the original model.
6. **Explore Electrical Circuits and Hydraulics** (Grades K-8) Children will make real world connections as they discover the use of electricity and hydraulics in automobiles and experiment with simple circuits and hydraulic activities.
7. **"Auto" Know Adventure** (Grades K-8) Younger children will explore the Museum exhibits looking for pictures and other auto-related items. Older children will explore exhibits to find answers to specific history and automotive-related questions.
